(Page 1) Condition monitoring tests and predictive maintenance can help pump operators determine when to overhaul pumps in a way that minimizes costs. It is hoped that the tools presented in this article will help asset managers and engineers apply predictive maintenance approaches and condition monitoring to process pumps, as well as improve ...

Download this article in PDF format. The impending 5G network has created a race for new spectrum bands to accommodate wireless traffic. As smartphone technology continues to offer more complex solutions, the need to transmit and receive paths from a variety of sources requires multiple bands operating simultaneously through a single antenna or ...

Apart from acceleration and driving performance, other criteria such as cost, range, and lifespan, as well as safety, are also critical. The cost of an EV battery is significant, arguably and prohibitive. \$/kW h is an important quantity in evaluating cost.

### A critical review of thermal management models and

Crystallization is one of the oldest separation and purification unit operations, and has recently contributed to significant improvements in producing higher-value products with specific properties and in building efficient manufacturing processes.

### Recent Developments in the Crystallization Process: Toward

Rohan M Ganapathy (26), is a Director, CEO & CTO at Bellatrix Aerospace Pvt. Ltd. Bellatrix is an IISc incubated company involved in the development of advanced in-space propulsion systems.

Papers are solicited in the area of wide band gap (WBG) semiconductor devices. While relevant work pertaining to all areas of materials, devices and systems based on WBG such as SiC, III-nitrides, diamond and Ga2O3 & its alloys are welcome, the focus of this thematic session will be on III-nitrides vs. the emerging family of Ga2O3 devices.
