DF-GLS vs. Augmented Dickey-Fuller This is almost completely taken from the Stata 11 Manual – Time-Series. dfgls. tests for a unit root in a time series.

DF-GLS vs. Augmented Dickey-Fuller

A time series is a series of data points indexed (or listed or graphed) in time order. Most commonly, a time series is a sequence taken at successive equally spaced points in time.

Time series - Wikipedia

The first edition of Basic Econometrics was published thirty years ago. Over the years, there have been important developments in the theory and practice of econometrics. In each of the subsequent editions, I have tried to incorporate the major

Basic Econometrics 5th Edition (by Damodar N. Gujarati

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

This paper examines the relation between stock returns and stock market volatility. We find evidence that the expected market risk premium (the expected return on a stock portfolio minus the Treasury bill yield) is positively related to the predictable volatility of stock returns.

Expected stock returns and volatility - ScienceDirect

A Markov chain is a stochastic model describing a sequence of possible events in which the probability of each event depends only on the state attained in the previous event.
