

introduction to optics pedrotti pdf

A telescopic sight, commonly called a scope, is an optical sighting device that is based on a refracting telescope. They are equipped with some form of graphic image pattern (a reticle) mounted in an optically appropriate position in their optical system to give an accurate aiming point.

Telescopic sight - Wikipedia

In optics, polarized light can be described using the Jones calculus, discovered by R. C. Jones in 1941. Polarized light is represented by a Jones vector, and linear optical elements are represented by Jones matrices.

Jones calculus - Wikipedia

The Jones calculus is a mathematical formalism for describing the propagation of polarized light through linear optical elements. It is based on the representation of light as a Jones vector, which is a two-dimensional complex vector. The Jones vector is multiplied by a Jones matrix, which represents the optical element. The resulting Jones vector describes the light after it has passed through the element.

Intensity (Physics) - Wikipedia

Die Intensität oder Strahlungsintensität ist in der Physik die Flächenleistungsdichte beim Transport von Energie. Die Bezeichnung wird meist für Wellenphänomene wie Schall oder elektromagnetische Strahlung verwendet, seine Definition umfasst aber auch alle anderen Arten von Energietransport.
