Thermodynamics is the branch of physics that has to do with heat and temperature and their relation to
energy and work. The behavior of these quantities is governed by the four laws of thermodynamics,
irrespective of the composition or specific properties of the material or system in question.

Activation Energy EA: is the minimum amount of energy required to initiate a chemical reaction. In a typical
human (romantic) relationship reaction, the reactants define the "single" (A) unattached human
molecules, the products define the full-relationship 'coupled' (B) or marriage pair, and the activation
barrier defines the minimum ...
