All of the participants correctly identified whether the candidate was male or female. For all studies we used analysis of variance (ANOVA) to test the effects of gender of candidate, the ask manipulation, and gender of evaluator on the dependent measure.

Organizational Behavior and Human Decision Processes

The current research explores the relationship between living abroad and self-concept clarity. We conducted six studies (N = 1,874) using different populations (online panels and MBA students), mixed methods (correlational and experimental), and complementary measures of self-concept clarity (self-report and self-other congruence through 360 ...
